Ten Reasons for using PMOD

PMOD is a software environment dedicated to the quantification of images in biomedical research. It consists of a number of unique and flexible software tools that have become the preferred solution in the quantification domain. Key success factors include:

Functionality

PMOD covers all data processing steps for true image quantification. Thus, PMOD users are freed from struggling with disparate tools and tricky data transfers. While focused primarily on PET, many of the quantification methods are generic and can be applied to other imaging modalities such as SPECT, MR and CT.

Ease of Use

PMOD provides an intuitive user interface. Many tasks are supported by straightforward workflows and protocols, facilitating the use of sophisticated techniques.

Reference

PMOD is clearly regarded as the reference tool for PET tracer characterization. No other software can refer to a similar number of kinetic modeling publications. More than 1300 peer-reviewed publications document the value of PMOD in biomedical research.

Innovation

PMOD keeps up with the state-of-the-art. Thanks to numerous collaborations with leading research centers and a dynamic development team, new methodologies and solutions come to the end user at unprecedented speed. Whenever needed, corrective maintenance builds are made available. Occasionally, dedicated functionality for individual users is implemented as contracted work.

Customer Base

PMOD boasts an expanding customer base comprising more than 500 sites with over 1500 active users worldwide. Many of them found it justifiable to abandon their in-house software programs and instead focus all their efforts on science without being distracted by software maintenance.

Clinical Trial Usage

PMOD was built for scientific and educational purposes. However, the Audit Trail License (ATL) type has been added for supporting the mechanisms for 21 CFR Part 11 compliant data processing. The ATL leverages PMOD functionality for analyzing clinical trial data while keeping an audit trail.

Independence of Modality, Species and Platform

PMOD is applicable to human and preclinical images from a wide range of modalities, and is computer- as well as scanner-independent. Therefore investments in PMOD are not compromised by evolving infrastructure.

Licensing

PMOD offers a modular and flexible licensing scheme. Licenses are standalone or network-based, and can be used without restrictions in time. Complete licensing information including pricing is available on the PMOD website.

Training

PMOD users can get started with easy-to-grasp entry-level tutorials, and are backed up by comprehensive documentation. For deeper insights or discussions, they also have the opportunity to attend the proven PMOD training courses. Dedicated application training is offered as a service.

Support & Maintenance

Technical support is provided via e-mail, within short response cycles, and by Skype or phone if needed. Face-to-face interaction and in-depth discussions are possible at the major conferences in the field at which PMOD regularly exhibits. PMOD's Maintenance Agreements provide the annual version upgrades and support at privileged terms. Extended support is offered at cost via PMOD's Support Packages.

"At our institution, PMOD is used for neuroimaging, oncology and preclinical applications... The comprehensive functionality and superb applications support make it a uniquely first-rate product."
Prof. Julie C. Price, Univ. of Pittsburgh, U.S.A.

About PMOD Technologies

PMOD Technologies aims to equip researchers with best-in-class software tools for biomedical imaging in humans and animals. Founded in 2003 as a spin-off from the Zurich PET center, PMOD has a strong background in image quantification. The PMOD suite of software tools is a comprehensive platform for quantitative biomedical imaging across modalities. It arguably represents the leading solution for PET kinetic modeling, and supports all required pre- and post-processing steps such as image matching, brain image normalization, automated volume-of-interest definition, and statistics.
