

PMOD Licensing and Pricing

PMOD is a suite of dedicated and flexible software tools for image quantification. A PMOD license comprises the mandatory base tool and possibly several additional tools.

Trial License

Before ordering, we highly recommend you operating a local trial license. Local trial licenses work for two months. They exclude saving, but on request the full functionality can be enabled.

License Types

Standalone license

- A standalone (single user) license is protected by a USB key.
- The PMOD software may only be started on a single computer at any time, and the USB-key must remain connected while using PMOD.

Network license

- A network license comprises a pool of clients (single licenses) which are managed by a local license server. The license server requires a USB key which must be connected all the time.
- Arbitrary machines (clients) in the local network can try and start their local PMOD installation. Upon startup, PMOD tries to book a free license from the license server. If one is available, PMOD starts, otherwise a message is shown indicating that all licenses are already in use.
- When PMOD is closed on a client, its license is returned to the license pool.
- The clients do not require a USB key, just a permanent network connection to the license server.
- All licenses of a network license must have the same tool configuration and version number.

Cloud license

- A cloud license comprises a pool of clients (single licenses) managed by a PMOD-operated license server in the cloud. Thus, the users are relieved from setting up a server infrastructure of their own.
- Analysis is performed locally, and no image data is transferred to the server.
- Arbitrary machines (clients) can try and start their local PMOD installation and use the cloud license, if Internet access to the cloud license server is available. Upon startup, PMOD tries to book a free license from the cloud license server. If one is available, PMOD starts, otherwise a message is shown indicating that all licenses are already in use.
- Cloud licenses require a Cloud License Agreement which details 24/7 access and which comprises annual subscription at a flat rate. When acquiring a cloud license, the subscription to the agreement is included, that is, the flat rate is waived as long as the license is in the latest annual version.
- A cloud license may be converted into a (perpetual) network license free of charge in case a customer wishes to cancel the cloud license subscription.
- Before acquiring a cloud license, please validate operation via a 30-day trial installation, as changes of firewall settings and alike may be required.

Audit trail license

- An audit trail license is a dedicated network license that exhibits 21 CFR Part 11 capability. It is augmented by functionality for tight access control, strong data protection, detailed change tracking, sophisticated logging of all activities, and flexible report generation.
- Audit trail licenses are offered with a mandatory Maintenance Agreement.

Quotes and Orders

For generating quotes and orders of new licenses, refer to www.pmod.com/open/order.html. For requesting a customized, formal quote (license upgrades, extensions, conversions, cloud licenses, audit trail licenses, and alike) and for any kind of assistance, please contact info@pmod.com.

For China, Japan, Korea, Malaysia, and Taiwan, sales and first-level support are provided by PMOD's exclusive reseller companies. Prospective buyers are invited to contact them directly.

Disclaimer: PMOD is a software FOR RESEARCH USE ONLY (RUO) and must not be used for diagnosis or treatment of patients.

¹ PMOD differentiates between prices for academic and non-academic, "commercial" customers (pharma companies, private clinics, clinical research organizations, and alike).

² Required with any license.

³ Comprises PCARDP (PET) and PCARDM (MR). PCARD requires PKIN in license configuration.

⁴ PGEM requires P3D in license configuration.

⁵ For dependency on target graphics HW, advance testing is recommended (www.pmod.com/open/trial.html).

⁶ Flat fee charged with any PMOD order, covering part of avg. cost related to order processing incl. shipment.

⁷ One concurrent client; volume discount on additional clients.

⁸ One concurrent client; volume discount on additional clients. Cloud License Agreement required. Annual flat rate per license: 950 CHF (waived, provided that the license is in the latest annual version).

⁹ One concurrent client; volume discount on additional clients. Maintenance agreement required.

Foreign Currencies

PMOD pricing is in Swiss Francs (CHF). In all quotes and invoices, as well as on the PMOD ordering page, the prices are converted into other currencies according to oanda.com.

Volume Discounts

On single orders for one local site, the following volume discounts are applicable:

- 30% discount on 2nd to 5th license (2nd - 5th instances of same tool)
- 50% discount on 6th and further licenses (6th and further instances of same tool)

Upgrades, Extensions, Conversions, Maintenance, Support

Next annual version + maintenance builds: for free.

PMOD Upgrade, Extension and Maintenance Policy: see www.pmod.com/open/pmod-upg-ext-mtn.pdf.

Conversions (e.g., standalone/network → cloud type): request customized quote at info@pmod.com.

Maintenance Agreements (Support Service Agreements): available on request.

PMOD support policy: www.pmod.com/open/support.html.
